Trust the Experience

STAYCOLD is a leading South African manufacturer of self-contained commercial fridges and freezers primarily for the beverage and hospitality industries. From its factory in Parys, the coolers are shipped world-wide, meeting the stringent business and quality requirements of many countries.

ABOUT OUR COMPANY

STAYCOLD is a manufacturer of commercial refrigeration with a global presence, dedicated to supporting the needs of leading food and beverage brands. We are specialists in display cooling and freezing. Now part of the UNI Group, we share a combined turnover of \$160m and we are one of the leading industrial groups within our sector in Africa.

Recognised as an innovator, we have a team approach to working with our customers so as to ensure that we achieve their goals. Our brand values encompass technical excellence, class leading refrigeration performance and leadership in relation to energy saving design.

The business began in 1979 in Parys, South Africa, where our home base factory is still located. STAYCOLD's factory is modern, safe and well laid out with excellent working conditions and productivity. We export our products to markets as diverse as Scandinavia and Australia, as well as Europe and other African nations. In 1998, an Export office was established in Chester, United Kingdom, to manage global brand relationships and to spearhead export growth.

PRODUCT FEATURES

High Quality Components

STAYCOLD units are manufactured using the best quality components that have been tried and tested in the marketplace and renowned for their reliability and durability.

Adjustable Shelving

Easily fitted, strong and height adjustable shelves are standard on all cabinets. Double door models have independent adjustment on both sides.

Excellent Self Closing Doors

Be it the simple gravity system on our sliding doors or the durable torsion bar system on our hinge door models, reliability is assured.

Anticorrosion Material

STAYCOLD cabinets are built using extensive anticorrosion measures throughout.

Easy Maintenance Access

Simple removal of the front ventilation grill allows for easy access to all the main components without having to move the cabinet from its location.

Only Front Ventilation Required

Intelligent design of the condensing unit allows for the unit to be placed flush against a wall with no side or back ventilation required.

Low-E Glass

Reduces heat loss by 27% compared to ordinary double paned glass. Increases the efficiency of the cabinet as well as eliminating sweating.

Double Pane Safety Glass

Both the internal and external panes of glass on a STAYCOLD cabinet are double tempered in line with international standards and ensuring that safety is not compromised in the event of a breakage.

Digital Control Module

Allows for simple control of the temperature of the cabinet as well as displaying the product temperature. Also can control the energy usage of the cabinet and protects the unit against poor power supply.

Copper & Aluminium Heat Exchangers

The use of the best copper and aluminium heat exchangers in the condenser and evaporator ensure the performance and efficiency of the unit.

Adjustable Feet

Levelling of the cabinet in position is easy by way of the adjustable feet on all four corners.

GreenSense is the new accreditation developed for STAYCOLD products that incorporate energy saving technology.

WHAT MAKES US BETTER

Added in 2011, the GreenSense concept was created to help guide our customers towards energy efficient products. The GreenSense and GreenSense Plus accreditations are given to products with 2+ or 4+ energy saving features respectively. The benefits to the customer are lower running costs, lower maintenance costs and increased rated service life. STAYCOLD products are also featured in the EIA's Pathway to Net-Zero Product List - a London based research group that supports and accelerates the race to net zero emissions by 2050.

Over a life span of a unit, the energy saving features of a STAYCOLD unit will do less harm to the environment whilst also saving you money.

Units manufactured at the STAYCOLD factory in South Africa are able to maintain perfect serve temperatures even in +40°C ambient temperatures.

STAYCOLD's factory in Parys is an ISO 9001:2015 certified facility with Sedex approval. A proud supporter of local procurement, the units manufactured have a 70% + local content contingent.
